

Glow in the Dark Stars

Great Explorations

Big Bang

KA-BOOOOM! The universe began about 15 billion years ago with a tremendous explosion called the “Big Bang”. We’ve captured a miniature Big Bang explosion in this package of stars. When you open it you can transform your ceiling or wall into a universe complete with glowing galaxies and dazzling constelations

Instructions

1. Apply a small piece of adhesive putty* to the back of each plastic star
2. Position each star; then push till secure.
3. Expose these stars to light for one minute. The turn off the lights and watch them glow!
4. To remove the stars, gently rotate them until they become free.

*Adhesives are safe and reusable. Please do not use them on fresh paint or wallpaper.
