

Star Explosion

Glow in the dark – Great Explorations

Bring the universe into your room with Star Explosion™

With over 600 Glow-in-the-Dark Astronomical shapes, you can create a universe of stars in your bedroom. Star Explosion puts the universe at your fingertips! The Glow-in-the-Dark shapes are re-charged with each exposure to light so the fun will never end. The possibilities are endless:

- Create constellations using the enclosed detailed star map
- Invent your own constellations
- Design new galaxies
- Position your stars in a spiral for the black hole effect.

Contents

- 5 large Stars
- 45 Small Stars
- 105 Mini Stars
- 100 Micro Stars
- 20 Astros
- 2 Adhesive Sheets (460 shapes)
- Adhesive Putty
- Star Map

Instructions

1. Apply a small piece of adhesive putty* to the back of each plastic star (Adhesive stars do not require putty)
2. Position each star; then push till secure.
3. Expose these stars to light for one minute. The turn off the lights and watch them glow!
4. To remove the stars, gently rotate them until they become free.

*Adhesives are safe and reusable. Please do not use them on fresh paint or wallpaper.
